• **Transport and installation.**

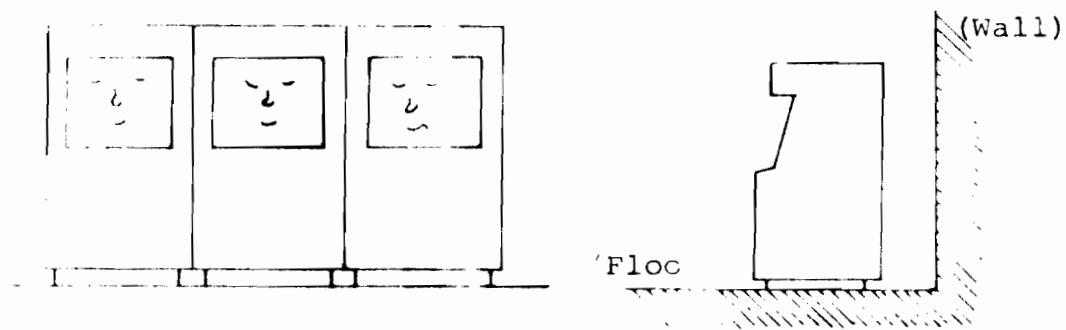

- **Attention**! Handling the transport box the package is fragile.
- **Indoor TRAMPOLINE** is for indoor use.
- **Install the machine indoors only.**

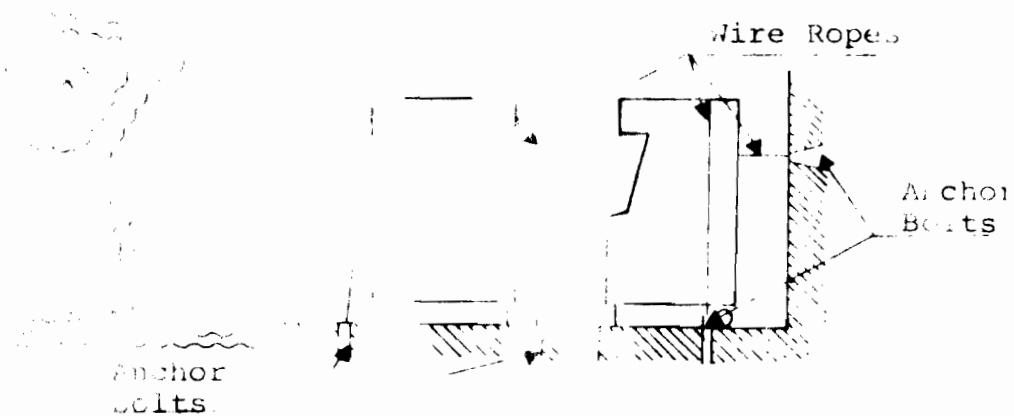

Install the machine indoors.

2. Place the machine on flat-surfaced floor and provide sufficient space in front of the machine.

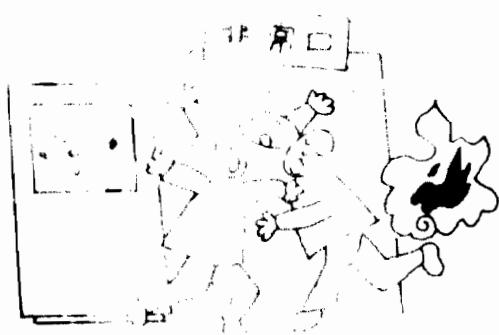

In case of installation in location with vibration, fix the machine by the use of **anchor bolts** and **wire ropes** as shown below.

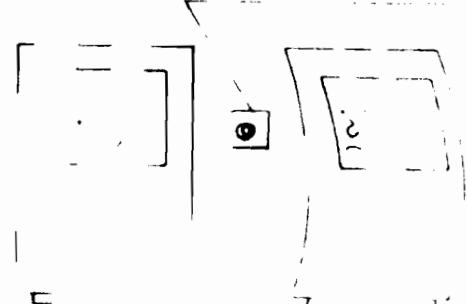

Do not leave the machine in dangerous places viewed from the angle of disaster prevention.

(Emergency Exit)

Fire Alarm

- Do not install the machine in location with exposure to direct sunlight or excessive heat in order to prevent the unit from rising internal temperature. Also, do not install the machine in location with being damp or dusty.

- Install the machine in location so that no children can enter the place between the backside of the machine and the wall of the location.
- Ensure all connections to the PCB's are secure.
- Never fail to connect the ground terminal.
- Insert the power plug into a proper outlet and turn the power switch on.

## Note and Warning

- Once a or partial ure may appear on the screen when the machine is first attached on. This is typical of solid-state circuitry and will correct itself automatically when the first lay is started.

### War ng:

- The TRAMPOLINE use CPU and the latest solid-state circuitry for long time. However, as with sophisticated electronic equipment, certain precautions must be observed to avoid damage.
  - Do not attempt service with ordinary testing equipment since the internal voltage of the logic junction may cause damage to the circuitry.
  - Do not touch or disassemble any of the solid-state devices while the power is on.

## 4. Routine maintenance

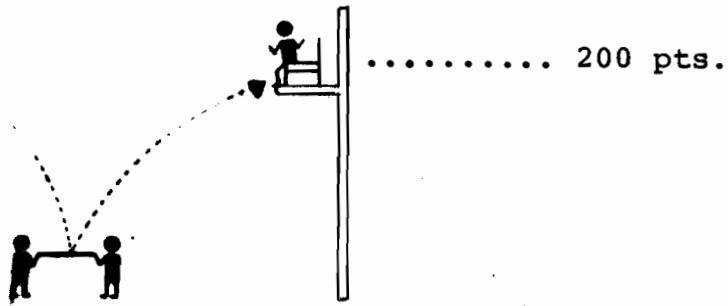

- Owing to the solid-state electronic circuitry, this machine should require very little maintenance and only occasional adjustments, however, it is necessary to take measures to insure its daily safety.

## 5. Playing Instructions

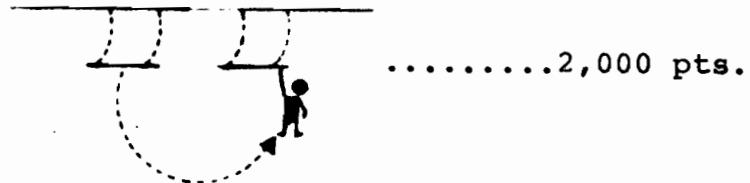

- One or two players.
- Insert coin(s).  
1 coin - 1 play (5 jumps), 2 coin - 2 plays (or 2 players)
- Select one or two player game.
- After the "music" was played, a man appears at either one of trapezes and the trampoline on the stage.
- Push the jumping button to release the man from the trapeze.
- If the man can swing to another trapeze, 2,000 points are scored.
- If missing, move the trampoline under the man by turning the control knob for continued play.
- Bounce the man from the trampoline and pop stars for points.
- Scoring:

..... 100 pts.

..... 200 pts.

..... 2,000 pts.

- In two player mode, the play alternates between the two.

### Functional Description of Game:

- Man will swing automatically after three seconds even if the jumping button is not pushed.
- The speed of man changes randomly.
- If all stars are eliminated, a second full set of stars will appear on the screen.
- The trampoline decreases to its size at random during play.

## 6. Adjustments on Main P.C. Board

(See Fig. 3 and Table 1)

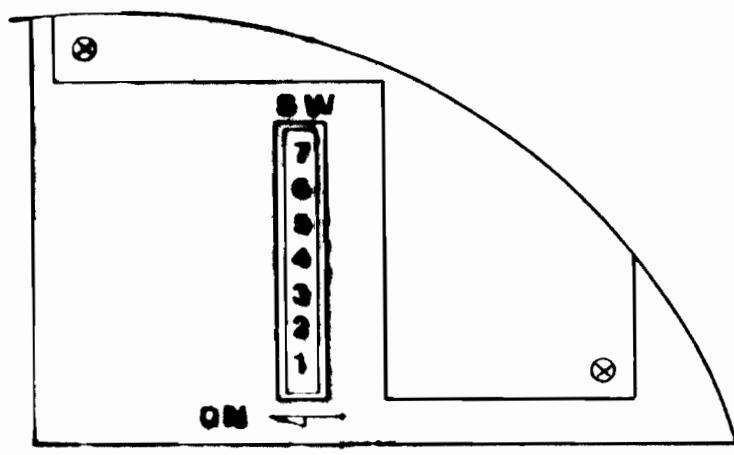

Fig. 3

• SW1 - SW4... Switches for adjusting jumps

The number of jumps is preset "5" at the factory.

JUMPS	SW1	SW3	SW4
3	OFF	ON	ON
5	OFF	ON	OFF
7	OFF	OFF	ON
9	ON	OFF	OFF

Table 1  
(Optional Setting)

• SW5 - SW7 ... Switches for adjusting solid-state modules

These switches are for the factory adjustments, and are preset at "OFF" position each.

## 7. Adjustments on Sub P.C. Board (See Fig. 4)

- To increase the sound, turn the pots (VR2, VR4, VR6, VR7, and VR8) clockwise as shown below.

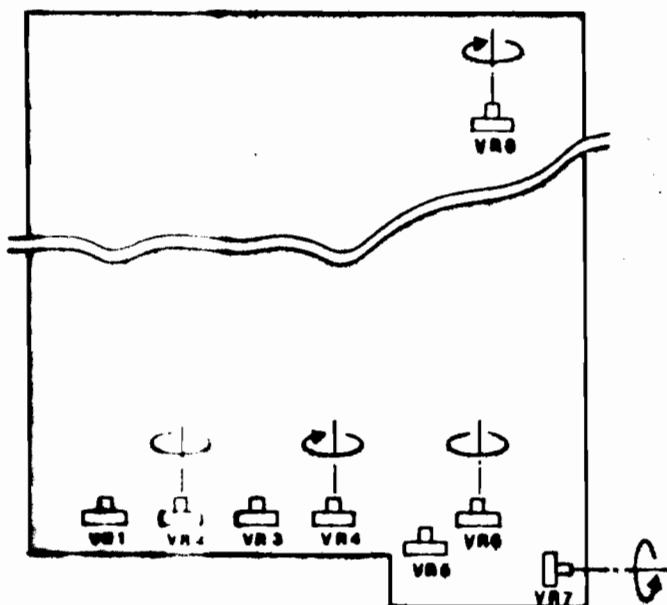

Fig. 4

**VR1...**Pot for adjusting tone of missing trampoline

**VR2...**Pot for adjusting volume of missing trampoline

**VR3...**Pot for adjusting volume of bouncing on trampoline

**VR4...**Pot for adjusting volume of popping a star

**VR5...**Pot for adjusting total tone volume

**VR6...**Pot for adjusting volume of bouncing on trampoline

**VR7...**Pot for adjusting total sound volume

**VR8...**Pot for adjusting volume of "music" at game-start

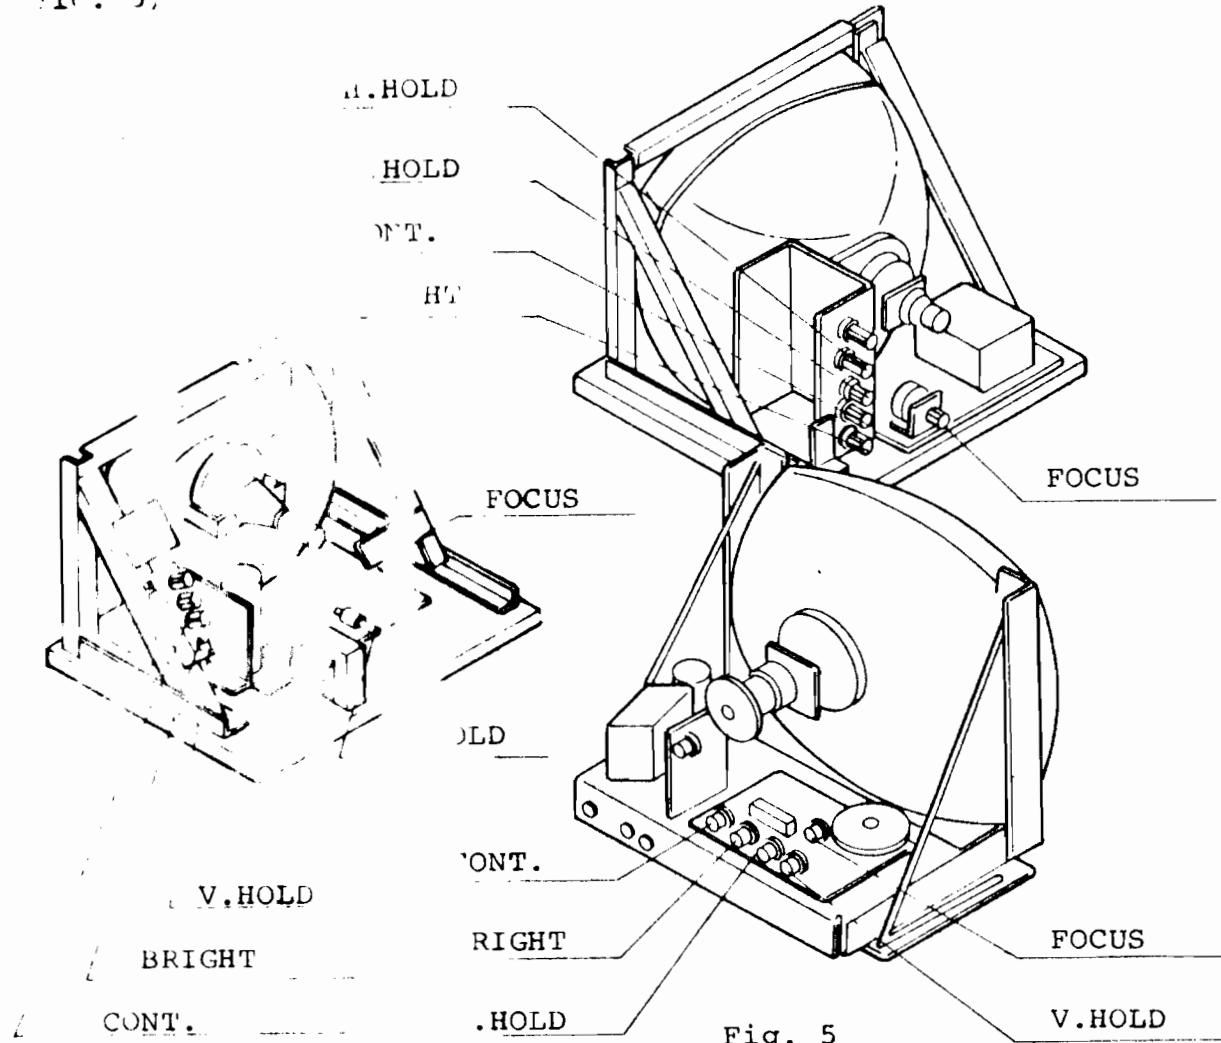

Fig. 5

The TV monitor is properly adjusted before shipping, however, if necessary, readjust it as follows:

• Horizontal Hold

Adjust the H. HOLD control if the picture is warped or broken into diagonal lines.

• Vertical Hold

Adjust the V. Hold control if the picture rolls vertically across the screen.

• Screen Contrast and Brightness

Adjust the CONT. and BRIGHT controls to keep the screen clear.

• FOCUS... Screen Focus Control

Note: The TV Monitor of Taito TRAMPOLINE is for exclusive use, therefore, it can not be replaced with that of other models.

## Adjustment of Supply Voltage (See Fig. 6)

If the voltage of the power supply is low, the picture on the screen sometimes disappears. In that case, change the error of the power transformer in the cabinet.

This adjustment is obtained by the use of the change-over switch

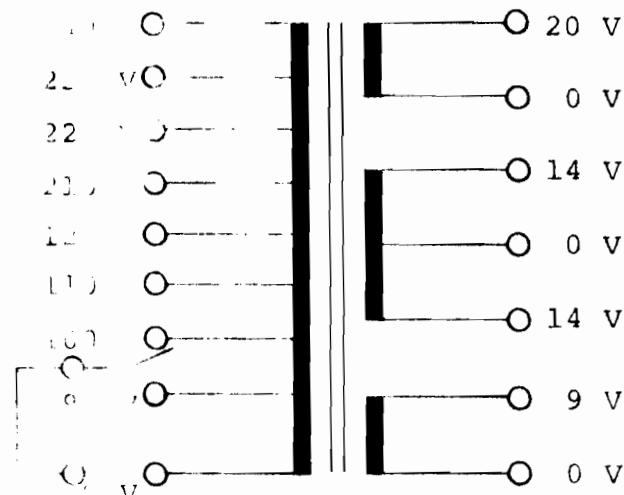

Fig. 6

## 10. Replacement of Control Knob Potentiometer (See Fig. 7)

- Open the front door and remove two wing nuts (located under the control board) and lift the control board.
- Replace the potentiometer with new one.
- Before mounting the new potentiometer, fully turn the shaft of it clockwise, then turn back approximately 150 degree.
- Also fully turn the knob clockwise, then turn back approximately 90 degree.
- Mount and fix the new potentiometer and the knob.
